

SHUTTLE

By: Sampson Mills

Made in NYC

Shuttle - Fabric For Acoustic Ceilings

Acoustic

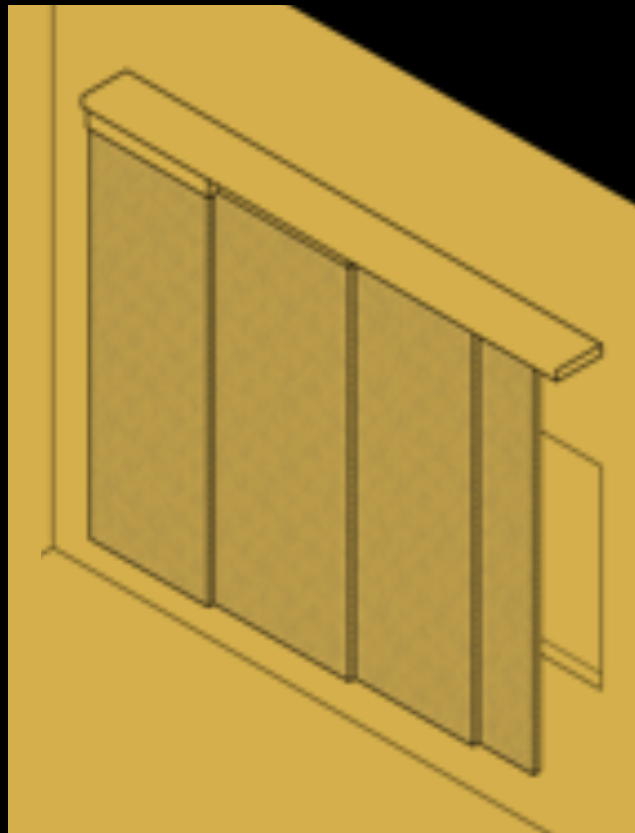

Great for music studios or just to help with the echo in that open concept room

Room Divider

Helps define spaces and can retract to open up the room for larger parties or gatherings.

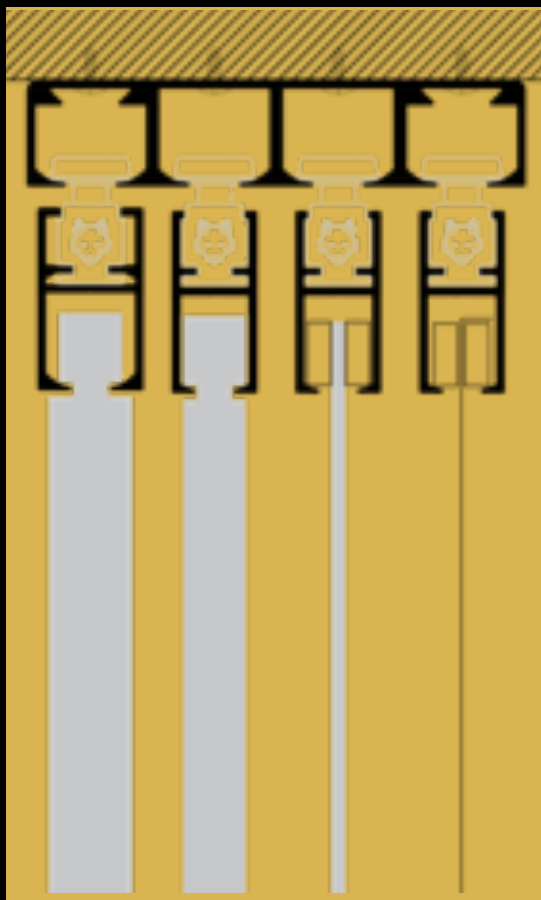

Locke

Helps to reduce tension.
Recommended for soft and stretchy
Suitable for up to 60 lbs fabrics Load

Shuttle - Felt

For space dividing and views

10mm - 8mm - 2mm - 0mm -
12mm 9mm 5mm 1mm

Privacy

Due to the predetermined angles of this system when installing you can have privacy where you need it and keep your views where you don't.

Materials

Works with a large range of materials in a variety of thicknesses under $\frac{1}{2}$ inch / 12 mm thickness. For other thicknesses please inquire.

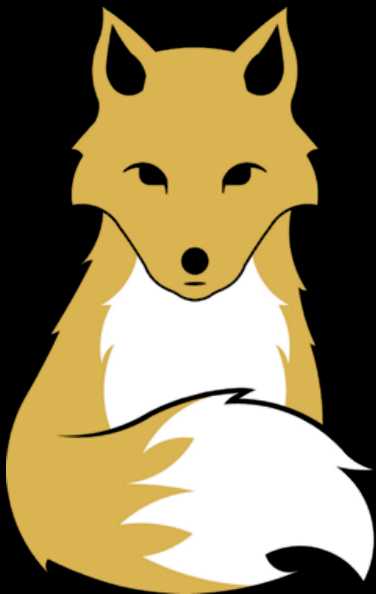

Curving

You can now curve the system due to our proprietary system design.

Min Radius: 10 inch
Max Radius: No Maximum

"Where your creativity can flourish with our ingenuity."
